## **10yr Labor Terms and Conditions**

### **Page 1 of 2**

Regular maintenance is the key to any peak machine performance and provides the best trajectory towards longevity. All 10yr labor plans provided by Missouri Furnace are **required** to have regular maintenance performed by Missouri Furnace Co. to allow us to provide labor at no additional cost for the 10 year term. This maintenance is in the form of regular clean and checks performed by our technicians twice per year.

First maintenance in the Spring of each year performed on your outdoor unit, A/C or heat pump. Second Maintenance performed on your indoor unit, furnace or electric air handler. This labor coverage provided along with the manufacturers parts coverage ensures your system is covered for 10 years with minimal cost to you for any repairs needed. **All plans & discounts are available when purchased with new appliance installations including any outdoor/coil combination or furnace only install.**
